# **Interpretation of 12-Lead ECG Workshop** >>>

NURSES FOR NURSES | HEALTH ED. PROFESSIONALS

## WHAT THIS EVENT IS ABOUT

---

This workshop's content is considered essential knowledge for any nurse working in the areas of ward telemetry, coronary care, critical care and emergency nursing. It also applies to the ward nurse wanting to upskill their knowledge of interpreting arrhythmias.

Understanding the 'famous five' basics of ECG interpretation will significantly aid the nurse in recognising any deviation from the normal. Midwives are also encouraged to attend this workshop as it will address the presentation of a condition called SCAD that can occur in the post-partum period with no traditional risk factors.

This short workshop emphasises how to interpret a myocardial infarction on a 12-lead ECG. Without other information taking away from this essential skill. Applicable for the nurse who only wants to upskill or learn to accurately and quickly how to recognise a myocardial infarction. This workshop will explore how early diagnosis leads to timely treatment and reperfusion of the occluded coronary artery.

## LEARNING OUTCOMES

---

At this event, you will:

- Describe how to work out the essential parameters: PR interval, QRS width, QT interval and relate this to the 'famous five' technique of rapid interpretation
- Identify the two most common myocardial infarctions: anterior and inferior
- Understand the significance of new Q waves and ST elevation on a 12 lead ECG
- Explain the significance of performing a 12 lead ECG on a woman with chest pain in the post-partum period

## YOU WILL ALSO LEARN

---

- How to recognise an acute myocardial infarction on a 12 lead ECG
- How to quickly analyse a rhythm strip using the 'famous five' analysis hints
- How to differential between ST elevation, ST depression and T wave inversion
- Recognise how angina presents on a 12 lead ECG
- Demonstrate how to interpret on a 12 lead ECG an acute anterior or inferior STEMI in three steps
- Demonstrate how to perform a 12 lead ECG accurately

*"What a fantastic speaker. I learned so much and plan on looking for online education or booking an entire conference on this subject. So relevant and relatable."*

- Dean, Telemetry & ECG Interpretation, Gold Coast 2023

## DETAILED ITINERARY

---

1300 – 1700 (Afternoon Tea Provided)

### Session One: Interpretation of the Foundations of Sinus Rhythm

In this session the presenter is going to discuss how to quickly assess for the 5 principals of sinus rhythm.

Reinforcing we must have an understanding of the normal prior to exploring the abnormal. We will examine how to identify the three essential parameters (values) that assist with analysis of a rhythm strip and relate this to the 'famous five' technique of rapid interpretation prior to examining the 12 lead ECG.

### Session Two: Interpretation of a 12 Lead ECG: Recognition of a Myocardial Infarction

Aimed at empowering nurses to interpret signs on a 12 lead ECG which indicate an acute myocardial infarction.

The two following sessions are the focus for this short workshop. The presenter will review the importance of examining the 12 lead ECG for Q waves and ST elevation with emphasis on the presentation of an acute myocardial infarction.

### Session Three: Interpretation of a 12 Lead ECG: Recognition of a Myocardial Infarction using the Three Step Method

The session will focus on how to interpret the 12 lead ECG interpretation in relation to identifying changes related to acute coronary syndrome: ST Elevated Myocardial Infarction (STEMI) and Non-ST Elevated Myocardial Infarction (NSTEMI).

It is essential knowledge not only for critical care and emergency nurses but especially for empowering ward nurses to speak with knowledge and understanding of the Acute Coronary Syndrome and intervene with assisting with timely interventions. The content will consist of both an acute inferior and anterior ST Elevation myocardial infarctions.

The presenter will highlight the importance of emergency nurses, cath lab nurses and midwives having understanding of a condition called spontaneous coronary artery dissection (SCAD) which is more common in woman. When it occurs, it is often found in late pregnancy or early post-partum period.

## OUR PRESENTER

---

**Anne Evans-Murray**, R.N., BHlthSc, MACCCN, Grad.Dip Ed, MEd, Dip Counselling, GradCertCritCare, CertIV Training & Assessment, CertIV in Mediation

Anne has a passion for teaching, which she does in an unpretentious way that ensures you will understand and retain what she presents and enjoy this learning experience. She has extensive experience, over 26 years lecturing for Gold Coast Health District and Griffith University. Currently, she is a guest lecturer at Bond University medical school.

Anne is a frequent presenter at workshops, conferences & seminars throughout Australia & New Zealand on subjects such as high dependency nursing, cardiac arrhythmias & ECG interpretation, chest x-rays interpretation, clinical assessment of the deteriorating patient, assertion training and leadership. She conducts accredited advanced life support training for nurses, doctors, and paramedics. Anne is passionate about empowering all clinical staff through increased awareness and knowledge of the critically ill patient's condition so that timely intervention is implemented, which will benefit patient outcomes. She is the author of three books: "ECGs Simply", "Interpretation

## REGISTRATION COSTS

---

\$280.00 incl GST

(NB: Registration cost doesn't include travel, accommodation, or travel insurance.)

## VENUE

---

### Dublin Docks

Harbourtown Shopping Centre, Harbourtown Dve, Biggera Waters QLD 4216 | (07) 5563 9433

## INCLUSIONS

---

- An extensive program based on current best practice
- A Presenter who is a recognised expert in her field and is excited to be able to share her skill, knowledge, and passion with Conference Attendees
- A seminar pack that includes a notepad, pen, and additional information to support a fantastic experience
- A transcript that identifies each session held including the session synopsis and session presenter/s
- A Certificate of Completion identifying the CPD hours to include in your CPD Evidence Portfolio

## INSURANCE

---

*The Nurses for Nurses Network strongly recommends customers take out travel insurance at the time of registration for an event to cover any unforeseen circumstances that may prevent them attending and thus incurring any financial loss.*

## DISCLAIMER

---

The opinions and statements of facts expressed in the Papers in these proceedings are those of the Authors and do not necessarily represent those of the Nurses for Nurses Network (NfNN), the editors, the organising committee or the supporters of this conference. No responsibility can be accepted by the organisers for errors or omissions in the individual papers. Sessions are correct at time of publication. Sessions are subject to change without notice due to circumstances beyond the control of the organisers. NfNN reserves the right to alter charges, cancel, postpone, change or withdraw the product or service at any time.

*"Omg Anne, words cannot explain how easily you describe ECG and how easy you make it to remember."*

- Liz, Telemetry & ECG Interpretation, Gold Coast 2023
